

Attorney Docket No. 1-74748

REMARKS

The courtesy of the Examiner in granting Richard S. MacMillan and the undersigned attorney a personal interview on January 25, 2006 is gratefully acknowledged. During that interview, Claims 1, 19, and 21 were discussed in light of the Troy and Levin et al. references. Specifically, it was discussed that the neither reference shows or suggests an article holder pivotally connected to a body, movable between storage and deployed positions, wherein the article holder is removably mounted to the body when in the deployed position, as claimed in amended Claims 1 and 19. It was further discussed that neither reference shows or suggests a trim component having a body, a lid movable between first and second lid positions, and an article holder supported on the body for movement between first and second article holder positions, such that the article holder is selectively engageable with the lid for movement with the lid between the first and second lid positions, as claimed in amended Claim 21. The Examiner agreed with the discussions and agreed to act favorably on this Amendment when filed.

The Examiner's finding that Claims 15 through 18 contain allowable subject matter is gratefully acknowledged. Accordingly, the Application now includes new Independent Claim 22 (which incorporates the limitations of Claim 1 and Claim 14), new Claim 23 which includes the limitations of Claim 15, new Independent Claim 24 (which incorporates the limitations of Claim 1 and Claim 16), and new Claims 25 and 26, which include the limitation of Claims 17 and 18, respectively.

As noted in the Interview Summary dated January 25, 2006, the Examiner agreed that the amendments to Claims 1, 19, and 21 submitted with this Amendment will overcome the prior art discussed, subject to further search and consideration.

Respectfully submitted,

  
Gregory W. Robinette
